1. PRODUCT OVERVIEW

The Era 1 Gaming Mouse is a high-performance peripheral device designed or gamers to provide exceptional and high-quality precision, speed, and durability. With the strategically positioned sensor and instant battery swapping capability, and a CPI indicator, the Era 1 represents the future of gaming. The mouse is designed specifically for right-handed users focusing on a palm/claw grip style. This mouse has been incorporated with high-quality components and innovative features to boost your gaming experience.

2. KEY FEATURES

- **Forward positioned sensor**: Sensor positioned strategically under fingertips to provide enhanced control and range of motion for exceptional performance and ultimately enhancing user experience.
- **Hot swappable battery**: The hot swappable battery brings benefits such as uninterrupted usage during gaming sessions, convenience, minimize delays and improve efficiency.
- **Connectivity**: Utilizes proprietary 2.4 GHz wireless technology with 1ms report rate.
- **8K polling rate**: For those who do require the highest level of performance, 8K polling rate provides a significantly more responsive and accurate input tracking. Its features also include reduced input latency over standard 1K polling rate, improved precision and better performance on high refresh-rate monitors.
- **Ease-of-use**: Simple and hassle free set up, Plug and Play!
- **On-The-Fly adjustment**: Switch CPI settings with the dedicated CPI button for precise control in any gaming situation.
- **Ergonomic build**: Comfortable grip and lightweight body design with quality construction to provide comfort over long working and gaming sessions.
- **Testing and verification:** Put through various QC verification processes and functional testing to provide gamers with a top-notch product.

3. TECHNICAL SPECIFICATIONS

3.1 SPECIFICATIONS

- PMW3360DM Optical sensor with resolution up to 12,000 counts per inch (CPI)
- Speed up to 250 inches per second (typical) and acceleration of 50G (max)
- On-The-Fly sensitivity adjustment using the CPI indicator featuring an RGB LED with a colour spectrum of 16.8 million colours
- Hardware: ESP32 added as main controller, fuel gauge IC for battery health monitoring, and RF module for wireless connectivity.
- Advanced power management features such as Auto-wake, Inactivity timeout, Connection-based shutdown
- Kailh GM8.0 micro-switches rated for 80 million clicks
- Maximum polling rate of 8000 Hertz, mouse sends data every 0.125 milliseconds (125 microseconds)
- 3.7V 200mah 401020 Lithium Polymer Li-po Rechargeable provides backup up to to 30 hours
- Ideal for medium to large hands, intended for right-handed gamers with palm/claw grip style
- OS compatibility: Windows, MacOS, Linux (USB Port Required)

3.2 APPROXIMATE SIZE & WEIGHT

Length: 118.5mm

Width: 66.5mm

Height: 44mm

Weight: 60 ± 3

4. BUILD & CONSTRUCTION

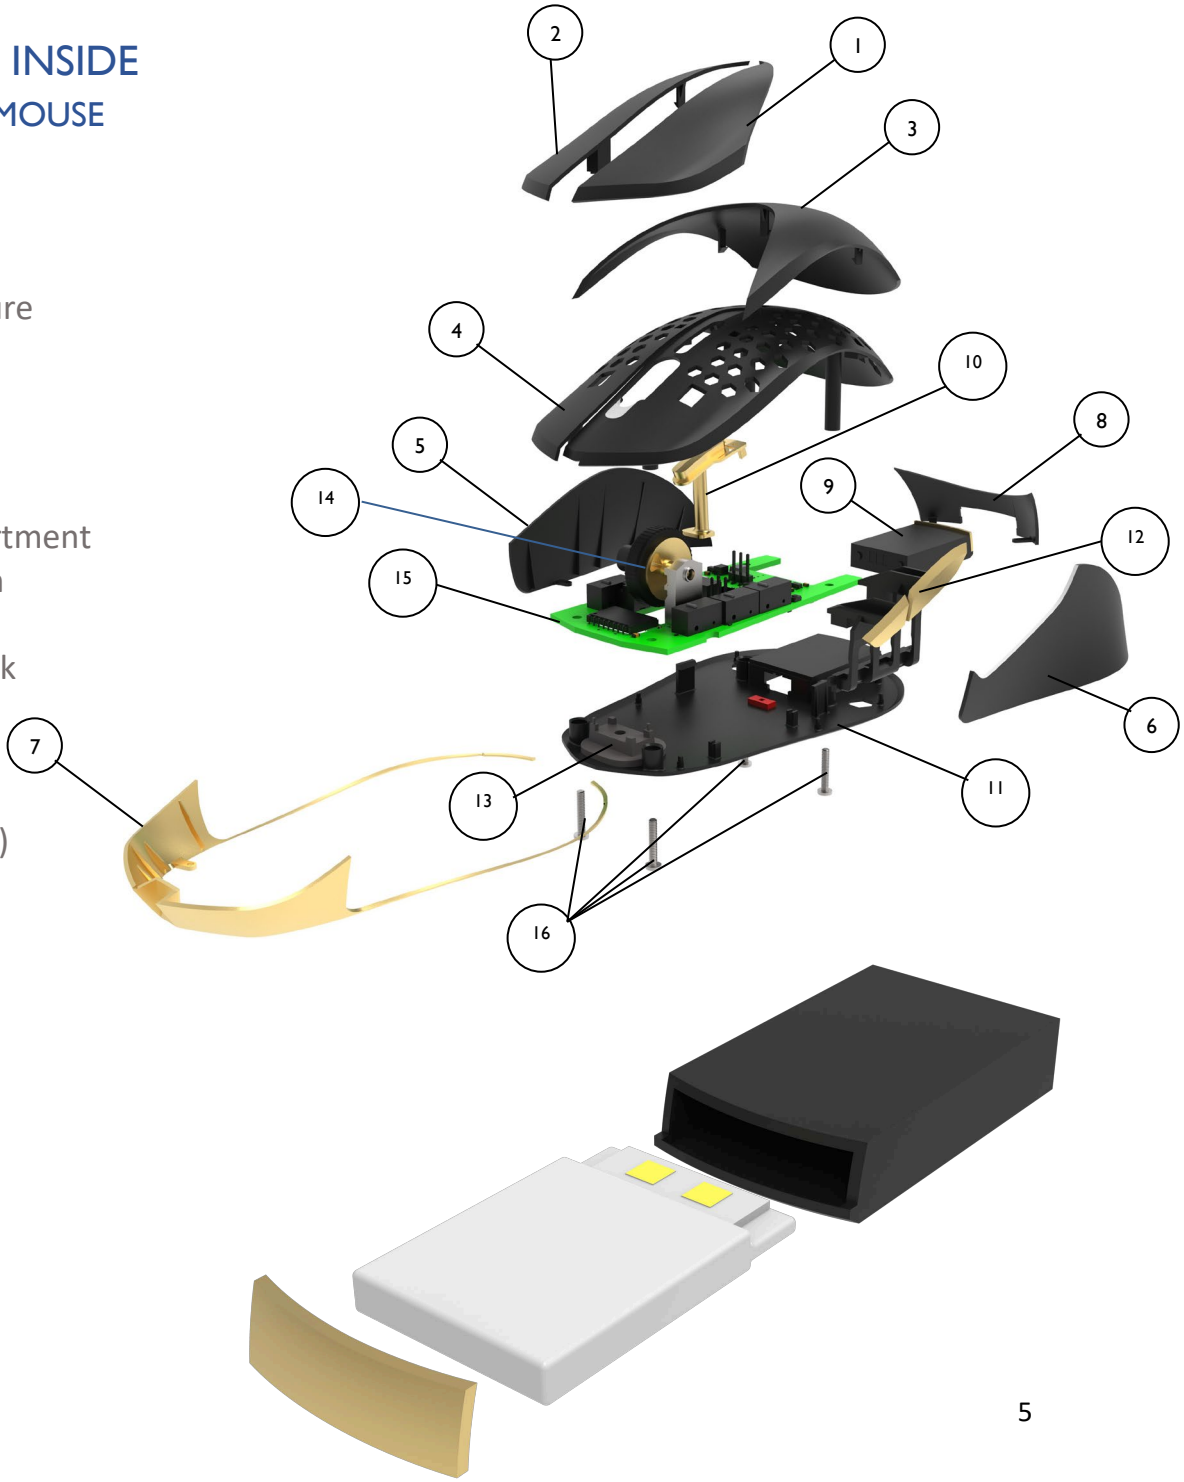

The Era 1 Wireless Gaming Mouse has an ultra-lightweight design which comes with a matte finish to give a premium feel, ensuring a non-slip and comfortable grip during intense and long gaming sessions while resisting common wear and tear due to a high quality PBT plastic build utilizing a rubberized grip and UV coating for enhanced comfort and longevity.

Era 1 comes equipped with two colors: **Black** & **White** (*both come with Golden highlights on the mouse body*).

5. WHAT'S INSIDE

5.1 ERA 1 MOUSE

1. Left Click
2. Right Click
3. Top Cover
4. Top Main Structure
5. Right Side Cover
6. Left Side Cover
7. Front Structure
8. Back Cover
9. Battery Compartment
10. DPI Click Button
11. Base
12. Side Button Click
13. Sensor Lens
14. Scroll Wheel
15. PCB
16. Screws (Qty: 04)

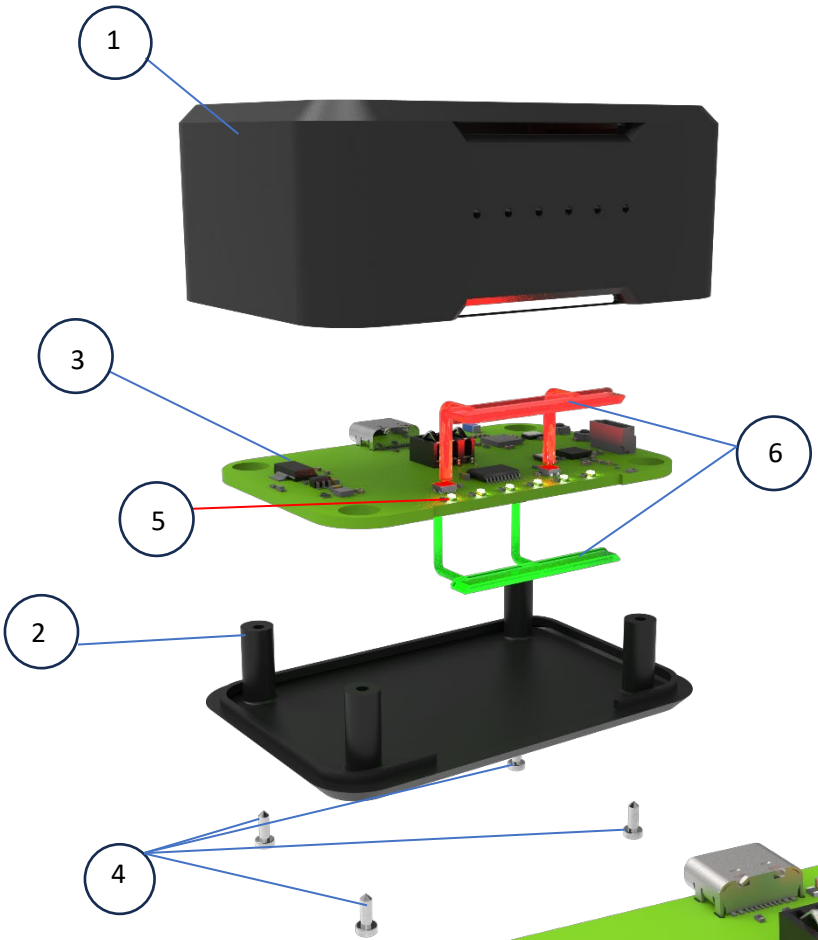

CPI PRESETS:

With the use of the dedicated CPI button for cycling through various pre-defined CPI levels, gamers can easily switch between CPI levels according to their sensitivity preference.

5.2 CHARGING DOCK FOR ERA 1 MOUSE

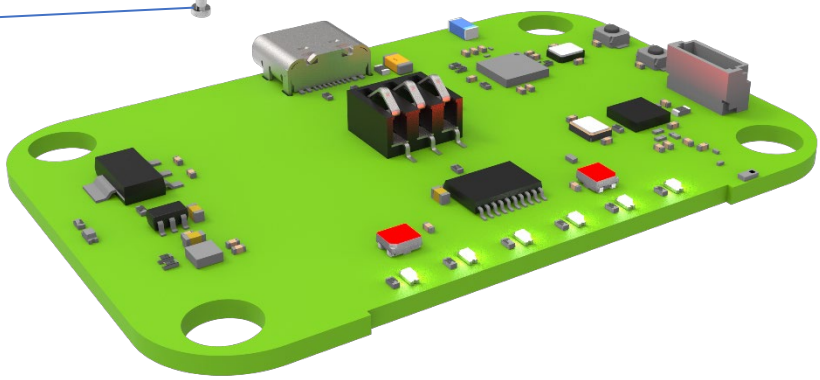

The charging dock has built-in LED indicators (illustrated below) which represent the current charging status of the mouse and provides a visual representation by utilizing LEDs. Following colors indicate the charging status.

- Green LED: Indicates the battery is fully charged.
- Red LED: Activates when the battery level drops to 15% or lower.
- White LED: Lights up during all other times.

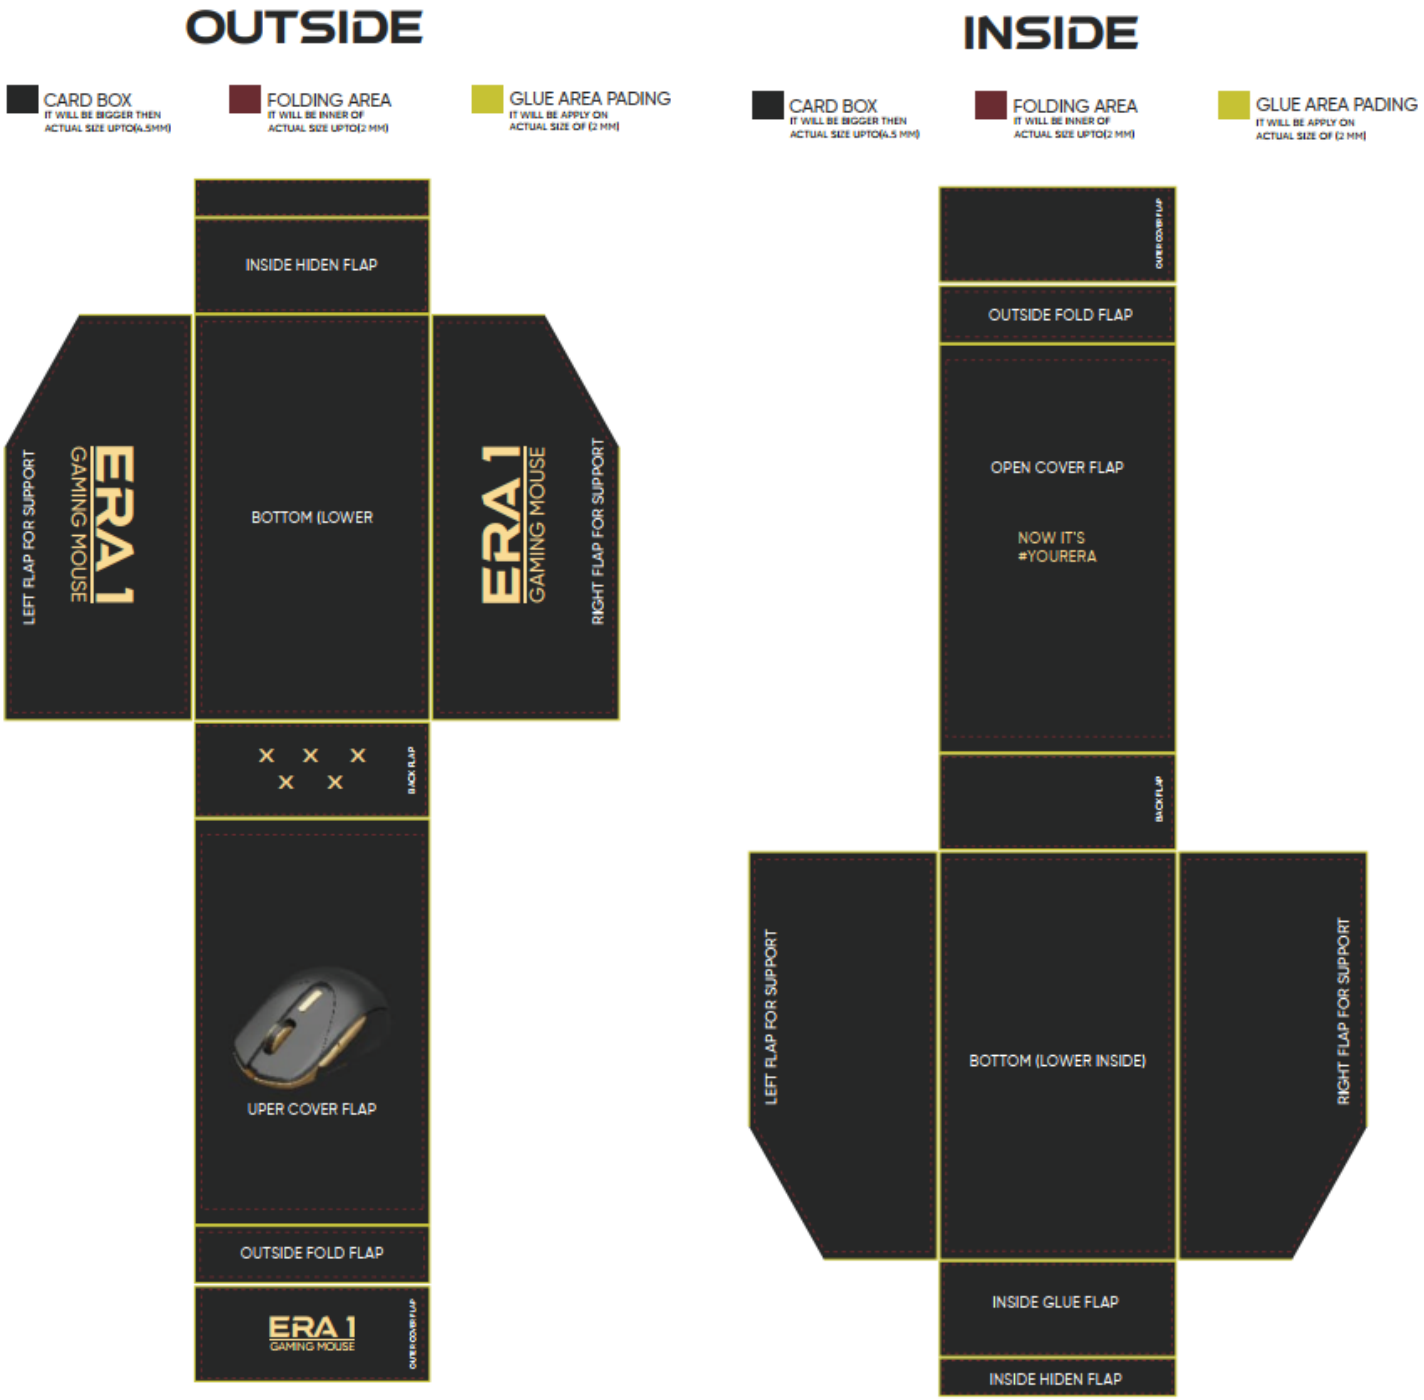

1. Top Cover
2. Bottom Cover
3. Printed Circuit Board (PCB)
4. Screw (Qty :04)
5. CPI indicator LED
6. LEDs

5.3 PACKAGING

The mouse comes packed in box made of eco-friendly materials for promoting sustainability. The box includes the mouse, the charger and the USB-C charging cable.

BOX PACKAGING

- External box dimensions are 140mm x 90mm x 60mm.

5.4 WHAT'S INCLUDED

- 1× Era 1 Wireless Mouse
- 1x Wireless Charging Dock
- 1× USB Type-C Charging Cable (1.8m)
- 1× User manual/Quick start guide

6. COMPLIANCE AND REGULATIONS

We take pride in ensuring that our product not only meet the highest standards of performance and quality but also comply with the relevant regulations and standards to guarantee the safety and satisfaction of our customers. Our gaming mouse, "Era 1", is designed with meticulous attention to detail and undergoes rigorous testing to ensure compliance with key regulations across the globe.

"ERA 1" exemplifies our unwavering commitment to delivering high-quality gaming peripherals that not only elevate your gaming experience but also meet the highest standards of regulatory compliance.

Safety Regulations

"ERA 1" complies with safety regulations set forth by prominent regulatory bodies such as the FCC (Federal Communications Commission) in the United States and CE (Conformité Européenne) marking requirements in the European Union. These standards encompass electrical safety, materials used in construction, and ergonomic considerations, ensuring that the device is safe for prolonged use by gamers of all ages.

Underwriters Laboratories (UL) Compliance

The Era 1 mouse, featuring a hot swappable battery system, adheres to Underwriters Laboratories (UL) standards for safety and performance. UL compliance ensures that the mouse meets rigorous safety requirements, reducing risks associated with

electrical hazards, overheating, and fire. The certification involves thorough testing of the battery swapping mechanism and overall device integrity. Compliance with UL standards provides users with confidence in the reliability and safety of the Era 1 mouse, aligning with industry regulations and enhancing its market credibility.

Electromagnetic Compatibility (EMC)

To prevent interference with other electronic devices and ensure resilience against external interference, "Era 1" adheres to stringent EMC regulations. Compliance with standards such as FCC Part 15 in the US and equivalent standards in other regions guarantees that the device maintains optimal performance without causing disruptions to nearby electronics.

Wireless Communication Standards

Built to seamlessly integrate with modern gaming setups, "Era 1" complies with wireless communication standards established by organizations like the Bluetooth SIG and Wi-Fi Alliance. Whether utilizing Bluetooth connectivity or other wireless technologies, our gaming mouse ensures compatibility with a wide range of devices while meeting radio frequency emission limits to ensure a smooth gaming experience.

Environmental Regulations

In alignment with our commitment to environmental responsibility, "Era 1" adheres to environmental regulations such as the Restriction of Hazardous Substances (RoHS) directive in the EU. By restricting the use of hazardous substances in its construction, our gaming mouse prioritizes sustainability and safety, contributing to a healthier planet for future generations. Additionally, "Era 1" complies with the Waste Electrical and Electronic Equipment (WEEE) Directive, which mandates proper disposal and recycling of electronic products at the end of their lifecycle. This ensures that our gaming mouse minimizes its environmental impact throughout its lifespan.

Product Markings and Documentation

Each unit of "Era 1" is labeled with regulatory markings, including *FCC Marking, CE Marking, UL Marking and WEEE Marking*s to signify compliance with relevant standards.

The Charging base included also comes labeled with *FCC Marking, CE Marking, UL Marking, WEEE Marking, Bluetooth SIG Marking and Wi-Fi Alliance Marking*s.

Furthermore, comprehensive documentation, including user manuals and compliance statements and markings, accompanies every purchase, providing customers with assurance regarding the regulatory compliance of our product.
